

Criterion, frozen before the run: predicted sign in all 6 strata and median |ρ| ≥ 0.30 (ΔT × aortic PWV negative, RI × peripheral vascular resistance positive). Magnitudes shown. Filled marker, predicted sign in all 6 strata; open, otherwise. Gamma route, tier A (accepted 103): only four strata had at least 8 subjects, hence the denominator 4.

Tier A, subjects accepted by the method itself; tier B, subjects accepted by every compared method; tier C, all subjects regardless of acceptance
