

Open, tier A; filled, tier C (joined by a thin line). Square and dotted line, fiducial-point analysis (database-supplied, tier C only). Fraction beside a marker, strata with the predicted sign / strata evaluated. Right, pass rate (fraction remaining in tier A) and ΔT offset from the fiducial point (tier A).

Tier A, subjects accepted by the method itself; tier B, subjects accepted by every compared method; tier C, all subjects regardless of acceptance

Exploratory, post hoc analysis; not used for the prespecified decision. Using an improved fit as a primary analysis would require a new preregistration.

Type 3, $n = 3,378$. Values in table 8. T, beat length.
